CS-333: Applied AI & Machine Learning
Lab Submission Instructions (GitHub Classroom)

Lab Submission Guide

This document explains **how to accept and submit** your lab using **GitHub Classroom**.

Step 1: Accept the Assignment

1. Open this link:

   👉 **https://classroom.github.com/a/6wVizUhF** (will change for other labs)
2. Log in using your **GitHub account**
3. Click **Accept assignment**
4. Wait a few seconds — GitHub will create **your private repository**

⭐ Each student gets **their own private repo**.

Step 2: Open the repository

1. Open your newly created **student repository**

Step 3: Upload Your Completed Notebook to GitHub

1. In the repository Click **Add file → Upload files**
2. Upload your **Lab01_RollNo_Name.ipynb**
3. Click **Commit changes**

⭐ This commit is your **official submission**.

Step 4: Verify Submission

- Confirm your notebook is visible in your repo
- No further action is required

⚠️ **Important Rules**

- Do **not** modify repo settings
- Copying from others is **not allowed**
- Notebook must run without errors
- Make sure to enter your Name and Section in the notebook
